

Top Project

After all of us reviewed each project independently we came together to compare notes and found **Team 3** collectively performed better on more areas of the prompt than other teams. Some teams performed better on research, others on argument development, and others yet on their interface designs but Team 3 performed at a high level across each of these areas. No one was without feedback and critique, so please review below to see how we assessed each team.

Thank You

From the Salesforce Design Team - Patrick, Ries, & Craig
